Not Ready Until Midsummer

Blooms without vase, soil, water, or care. Unique for table, room, or window decoration. Rose-tinted blossoms shade to a pearly-white and exhale refreshing fragrance. Simply place the bulb in a dish, bowl, saucer or on the table or window sill in a little light and watch it grow. As the blooms fade, cut them off and others will follow. Plant them out of doors or in pots after blooming has ceased, dig them in July, dry them in darkness for three weeks, and use them inside again.

HYPER-HUMUS—100% Organic

It renders clay soils lighter in character and more aerated. It binds together sandy soils and makes them more compact. It acts like a sponge, being capable of holding 90% of its weight in water, which is 4 to 5 times the capacity of the ordinary dirt. It increases soil temperature. It is odorless. It contains 10% carbonate of lime in solution and has three times the ammonia that manure does in its natural state. It furnishes nitrifying bacteria. It can be secured at any season of the year.
